SUMMARY

A dedicated Android Software Development Specialist with a strong foundation in Industrial Engineering from Balıkesir University. Proficient in Kotlin and Java, I have a proven track record of developing advanced Android applications and enhancing project architectures. My experience includes internships and professional roles at leading Turkish tech firms. Currently, I am contributing to Android development at Ebebek, continuously striving to improve my skills and knowledge. Driven by a passion for technology, I am also exploring iOS technology and am committed to continuous learning and delivering the best results in every project.

EDUCATION

Balikesir University

Bachelor's Degree in Industrial Engineering
2018 – 2022

CERTIFICATIONS

- Meta Android Developer Professional
- Advanced App Development in Android Imperial Collage London
- Alberta Software Design and Architecture
- Dive Into Refactoring
- Cambly Certificate of Accomplishment
- Google Project Management: Fundamentals
- Advanced Android Bootcamp 2023
- Dagger-Hilt Dependency Injection Masterclass
- Android Jetpack Compose: The Comprehensive Bootcamp
- Android TDD Masterclass - Coroutines, Jetpack

SKILLS

- **Kotlin & Java** – Advanced Android Development
- **Jetpack Compose** – Modern UI Development
- **Keras & TFLite** – Applied Machine & Deep Learning
- **Software Design & Refactoring** – Enhancing Code Quality and Maintainability
- **Project Management** – Leading and Delivering Successful Projects
- **Effective Communication** – Clear and Concise Collaboration with Teams
- **Problem Solving** – Analytical Thinking and Innovative Solutions
- **Mentorship & Instructiveness** – Guiding and Educating Team Members

PROFESSIONAL EXPERIENCE

INTETRA

Partner Android Developer   *01/2025 - Present*

- I am taking part in the KGM Traffic AUS Mobile project.

EBEBEK

Android Software Specialist   *04/2023 - Present*

- Redesigned the project architecture, enhancing overall system stability and maintainability.
- Fixed security vulnerabilities through static and dynamic analysis, significantly improving application security.
- Improved build performance and optimizing the app's efficiency user interface.

IT Intern   *11/2021 - 02/2022*

- I worked with Ebebek IT Manager on mobile technologies.

LOGO SOFTWARE

Android Developer   *04/2022 - 04/2023*

- Maintained and updated software using Java and Kotlin, ensuring high code quality through rigorous unit testing and thorough documentation.

Android Developer Intern   *02/2022 - 04/2022*

- Developed Kotlin applications using MVVM and RESTful architecture, leveraging Room, Coroutines, Dagger-Hilt, and Navigation. Conducted unit testing with MockK to ensure robust and reliable code.

YAPI KREDI

Intern   *07/2021 - 09/2021*

- We finished first with the "Yapı Kredi HAL" application presentation that we prepared with my team.

QNB FINANSBANK

Finance Intern   *11/2021 - 12/2021*
