

IBRAHIM CAN ERDOGAN

Founder & Software Engineer

ibrahimcanerdogan@outlook.com | ibrahimcanerdogan.github.io | linkedin.com/in/ibrahimcanerdogan

PROFILE

Software engineer, product builder, technical educator, and founder of Akhisar Dijital. I build maintainable mobile and web products from discovery through production, combining hands-on engineering with product thinking, release quality, and business value. Android and Kotlin remain core strengths alongside Next.js, TypeScript, and end-to-end product delivery.

WORK EXPERIENCE

Founder & Software Engineer, AKHISAR DIJITAL

Apr 2026 - Present

- Founded Akhisar Dijital to deliver software, digital products, and technology services.
- Lead product discovery, architecture, implementation, release hardening, and client delivery across mobile and web projects.

Android Software Specialist, EBEBEK

Apr 2023 - Apr 2026

- Delivered Kotlin features across payments, wallet, checkout, store discovery, and core commerce flows.
- Resolved security findings, strengthened app architecture, and improved release quality with testing and CI/CD practices.

Android Developer, LOGO SOFTWARE

Feb 2022 - Apr 2023

- Modernized Java Android codebases with Kotlin, Coroutines, MVVM, Jetpack libraries, and dependency injection.
- Built warehouse and field-sales features with unit and UI testing, code review, and structured delivery.

Early Career Programs, EBEBEK IT, QNB & YAPI KREDİ

Jul 2021 - Feb 2022

- Completed IT and banking programs; collaborated on the first-place Yapi Kredi HAL mobile app presentation.

EDUCATION

Bachelor of Industrial Engineering, BALIKESİR UNIVERSITY

Aug 2018 - Dec 2022

- Thesis: Sentiment Analysis of YouTube Comments Using Deep Learning and NLP Techniques.

SELECTED EXPERTISE
